

S Deepak Achary

Senior Data Analyst

Hyderabad, Telangana | +91 70397 73570 | deepakachary246@gmail.com | linkedin.com/in/sdeepakachary | github.com/sdachary/sampada

PROFESSIONAL SUMMARY

Senior Data Analyst with 6+ years of professional experience, including 3+ years building data pipelines, automations, and AI/Copilot-enabled reporting for banking & finance and enterprise clients at a global bank. Expert in Python, SQL (BigQuery, MySQL), Power BI, Looker, and Tableau, with hands-on GCP cloud experience and BI platform migration (Tableau to Power BI/Looker). Proven ability to design automations that replace manual processes, govern highly confidential PII data in line with GDPR, and deliver stakeholder-facing analytics within Agile delivery. Active open-source contributor and independent builder of AI-enabled SaaS platforms and self-hosted infrastructure outside of core banking work.

CORE SKILLS

Analytics & AI: Data & Business Analysis, Data Visualization, Dashboard Development, AI/Copilot-enabled Dashboards, Local LLMs (7B Models), GitHub Copilot, OpenCode, Model Context Protocol (MCP), AI Prompt Engineering, Semantic Data Modelling, KPI Reporting, Requirements Gathering, Stakeholder Management

Programming & Databases: Python (Pandas, NumPy, BeautifulSoup), SQL, Bash, BigQuery, MySQL, PostgreSQL

BI & Visualization: Power BI (DAX), Looker, Tableau, Microsoft Fabric, Excel

Data & Cloud: Google Cloud Platform (BigQuery, Dataflow, Cloud Storage), Microsoft Azure, ETL/ELT, Data Modelling, Stored Procedures, Spark, Databricks, Delta Lake

Automation & DevOps: Python Automation, Power Automate, Tableau REST API, Looker API, Git, CI/CD, Harness, Terraform, Azure DevOps

Governance & Delivery: GDPR & PII Data Governance, Agile/Scrum, Jira Align, Confluence, Mentoring

PROFESSIONAL EXPERIENCE

Lloyds Technology Centre (Banking & Finance) | Hyderabad, India

Senior Data Analyst | Dec 2023 - Present

- Built a Python automation that matches open job IDs to the most suitable candidates (grade, top-3 core skills, and secondary-skill overlap), enabling the People & Places team to onboard new hires into the right job profiles and teams.
- Drove enterprise adoption of Looker: developed Python automation that resolves ServiceNow (IT) tickets to onboard business teams by provisioning Looker projects, roles, and triggering AD-group creation for role-based access.
- Designed an automation tool that extracts Tableau metadata (workbooks, data sources, calculations) via the Tableau REST API using a service account and feeds it into Power BI to auto-generate data models, significantly reducing manual model-building during Tableau to Power BI/Looker migration.
- Owned the Tableau decommission process: created 2 Power Automate flows to notify workbook owners whose migration plans were missing from the SharePoint master sheet and to record their responses.
- Leading the reimagining of the Tableau site in Power BI; building reusable template dashboards to reduce duplication across 300-400 internal Tableau views (by business unit, location, time period) on a ~1.7 GB dataset migrating to Microsoft Fabric.
- Wrote SQL stored procedures in GCP BigQuery and performed semantic data modelling to power AI/Copilot-enabled dashboards with row/column-level PII security, ensuring only authorized users can access sensitive data.
- Enforced GDPR and enterprise data policies while handling high-confidentiality human-capital (HC) and PII data; leveraged local 7B-parameter LLM models (via Copilot and OpenCode, integrated using Model Context Protocol) on virtual machines to eliminate data-leakage risk.
- Delivered data-driven reporting to external stakeholders, distributing ~4,000 PDF reports by email on a monthly basis.
- Led Agile ceremonies (sprint planning, review, retro) as the team driver, planned work in Jira Align, documented architecture/processes in Confluence, and presented solutions to business, platform, and end-user audiences.
- Contributed to the open-source project "Sampada" (github.com/sdachary/sampada) and adopted modern tooling - infrastructure-as-code with Terraform, CI/CD on Harness, and applied LLM concepts - strengthening automation and collaborative development skills.

PERSONAL PROJECTS

Udhyam (formerly Gold Vault) | Independent SaaS Project | Supabase, Cloudflare Pages/Workers, Terraform

- Designed and built a multi-tenant SaaS platform (billing, inventory, ledger, orders, daily reconciliation) with a Supabase backend and an AI-assisted chat interface.
- Set up the full deployment pipeline independently: infrastructure-as-code with Terraform, GitHub Actions CI/CD, and a dev/staging/main branch-protected release process.

Sampada (Open Source) | github.com/sdachary/sampada | Ruby on Rails, Terraform, CI/CD

- Maintain an open-source Rails application that automates job-search workflows, including an in-progress mobile readiness audit targeting an Android-first release via Capacitor.

acharylab | Personal Infrastructure & Automation | Docker, Terraform, Tailscale

- Designed and maintain a self-hosted homelab across cloud VMs and a local workstation, covering secrets management, containerized services, and networking.

CERTIFICATIONS

- Data Analytics - Google (Cursa Learning)
- Python Fundamentals, Python NumPy, and Python Pandas - Great Learning
- MySQL - Cursa Learning

EDUCATION

Master of Business Administration (HR & Operations), Biju Patnaik University of Technology (BPUT), Rourkela | 2016

Bachelor of Technology (Mechanical Engineering), Biju Patnaik University of Technology (BPUT), Rourkela | 2014

ADDITIONAL INFORMATION

Languages: English, Hindi, Telugu, Odia

EARLIER EXPERIENCE

Sr. HR Admin | Automotive Manufacturers Pvt. Ltd., Hyderabad | Sep 2016 - Nov 2019

- Managed employee lifecycle processes (onboarding, records, performance reviews) and maintained labor-law compliance across HR operations.

Team Leader, QC Operations | Wicked Ride Adventure Services Pvt. Ltd., Hyderabad | Dec 2019 - Feb 2020

- Led quality-control operations, work-order tracking, and cross-department issue escalation and resolution.

Freelance HR Consultant | Continental Tele Services, Remote | Mar 2022 - May 2022

- Built and maintained a company HRMS on Google Sheets as an independent consulting engagement, designing new features and troubleshooting integration.
